Definitions

- **Publisher's portal** – a Publisher's imprint website where the Author uploads the manuscript and adds/edits Author information
- **Standard publishing service** includes assigning an ISBN to the book, providing cover image options, cover layout, imprint mark, editorial assistance in the publishing process, sourcing the book to all sales channels available to the Publisher and printing the book upon orders
- **Net sales** – income generated by the Work, which is calculated as follows:

Net sales = (Net retail sales price × copies sold) - the average bookseller/wholesaler discount

The bookseller/wholesaler discount is set as follows (which may vary depending on the distribution channel):

30% of the net retail sales price in EUROS in the case of sale to end consumers via the online shop associated with the Publisher;

50% of the net retail sales price in EUROS in the case of sale to/through all other external distribution partners.

Copies purchased by the Author directly via the online shop associated with the Publisher and any free copies/sample copies will not be included in the Net Sales and royalty calculation.

- **Example of Royalty Calculation**

If the retail price of the book is 59.90 EUR and a copy is sold through a distributor partner who retains a 50% distribution fee, the net sales amount used for the royalty calculation is:

$$59.90 \text{ EUR} - 50\% = 29.95 \text{ EUR}$$

The Author's royalty of 12% is then calculated on this net sales amount:

$$29.95 \text{ EUR} \times 12\% = 3.59 \text{ EUR}$$

This amount (3.59 EUR) will be added to the Author's royalty statement.
